

Evergreen Demo Installation for the Czech Environment

Evergreen demo installation (as of June 29th, 2024, version 3.13.1 is used) localized to Czech and containing Czech data is available at:

<https://evergreendemo.katalog.jabok.cz/> (online catalog) and <https://evergreendemo.katalog.jabok.cz/eg/staff/> (web client). The installation is based on sample data set known as Concerto (https://wiki.evergreen-ils.org/doku.php?id=qa:concerto_logins) used by the community demo servers.

The Czech demo installation is intended for everyone interested in testing Evergreen with Czech data. It contains 101 bibliographic records (with the exceptions of records representing e-books and e-serials, holdings are also included), 10 authority records, 10 patron records and 10 library staff records.

Manuals

If you are not familiar with Evergreen yet, you can benefit from information available through this documentation portal. We especially recommend a section entitled Manuály (in the left sidebar; in Czech only). For the English speaking audience, we recommend the official Evergreen documentation available from <https://docs.evergreen-ils.org/>.

Logins

You can log in to the demo database using **logins for library staff** in Table 1.

Table 1: Library Staff Logins

First Name	Last Name	User Type	Username	Barcode	Home Library (Work Org Unit)	Password
Lucie	Peřinová	Catalogers	kn1lperinova	12348111	Example Branch 1 (KN1)	luciep1234
Jiři	Novák	Circulators	bb1jnovak	12348222	Bookmobile 1 (BB1)	jirin1234
Alena	Plachtová	Circulators	bb1aplachtova	12348333	Bookmobile 1 (BB1)	alenap1234
Vít	Novotný	Acquisitions	pob1vnovotny	12348444	Example Branch 1 (POB1)	vitn1234
Ivana	Báječná	Acquisitions Administrator	pob1ibajecna	12348555	Example Branch 1 (POB1)	ivanab1234

First Name	Last Name	User Type	Username	Barcode	Home Library (Work Org Unit)	Password
Petr	Mochov	Cataloging Administrator	kn4pmochov	12348666	Example Branch 4 (KN4)	petrm1234
Jitka	Ondříčková	Circulation Administrator	kn4jondrickova	12348777	Example Branch 4 (KN4)	jitkao1234
Tomáš	Kemr	Local Administrator	kn3tkemr	12348888	Example Branch 3 (KN3)	tomask1234
Alena	Malá	System Administrator	kn3amala	12348999	Example Branch 3 (KN3)	alenam1234
Jiří	Podhrázský	Global Admin (with highest permission)	kn2jpodhrazsky	12348100	Example Branch 2 (KN2)	jirip1234

You can log in as a patron using **sample logins for patrons** in Table 2.

Table 2: Patron Logins

First Name	Last Name	User Type	Username	Barcode	Home Library	Password
Hana	Loukotová	Patron (an expired account)	LoukoHana	12345069	Bookmobile 1 (BB1)	hanal1234
Aneta	Kikorová	Patron (account that is about to expire)	KikoAnet	12345320	Example Branch 2 (KN2)	anetk1234
Alexandra	Kubešová	Patron (a valid account)	KubeAlex	12345389	Example Branch 4 (KN4)	alexk1234
Eva	Kovandová	Patron (a valid account)	KovaEva	12345003	Example Branch 3 (KN3)	evako1234
Natálie	Šandorová	Patron (a valid account)	SandNata	12345576	Example Branch 2 (KN2)	natas1234
Jakub	Bednář	Patron (a valid account)	BednJaku	12345599	Example Branch 1 (KN1)	jakub1234
Viktorie	Dienstbierová	Patron (a valid account)	DienVikt	12345876	Example Branch 1 (KN1)	viktd1234
Kateřina	Dospivová	Patron (a valid account)	DospKate	12345660	Bookmobile 1 (BB1)	kated1234
Daniel	Pecháček	Patron (a valid account)	PechDani	12345999	Sub-library 1 (POB1)	danip1234
Darja	Šnáblová	Patron (a valid account)	SnabDarj	12345871	Example Branch 1 (KN1)	darjs1234

Bibliographic Records

The list of all bibliographic records can be pulled using the **-xxx** or ***** query in the online catalog.

You can get URLs to all of the bibliographic records (from record #1 to record #101) by appending the record number to the URL: <https://evergreendemo.jabok.cuni.cz/eg/opac/record/>, e.g.:

<https://evergreendemo.jabok.cuni.cz/eg/opac/record/1>

<https://evergreendemo.jabok.cuni.cz/eg/opac/record/101>

The bibliographic records, with the exception of those representing e-books and e-serials, also include

holdings data.

Authority Records

The database also contains authority records with IDs going from 1 to 10. You can edit them after logging in the web client with library staff credentials with appropriate permissions.

Individual records can be found using the following URLs:

from

<https://evergreendemo.jabok.cuni.cz/eg2/cs-CZ/staff/cat/authority/edit/1>

to

<https://evergreendemo.jabok.cuni.cz/eg2/cs-CZ/staff/cat/authority/edit/10>.

Restoring the Database

The database will get wiped and replaced with the original data as needed. At first, our intentions are to restore the database every three months.

Scripts

[Scripts from the original demo installation/database which have been modified and used to fill the database with Czech data:](#)

skripty_ceska_demo_instalace_v1.zip

Modified scripts are (just like the original scripts) available under the GNU GPL. The scripts have been modified by Václav Jansa, using inputs provided by Eva Cerniňáková and Linda Jansová.

A prerequisite for running the scripts is a pristine Evergreen installation (see [Evergreen Downloads](#)). Files with a cz prefix have to be copied to the directory of files extracted from the original installation tarball:

Open-ILS/tests/datasets/sql

After installing the database (for more information, see step 13.2 of the installation guidelines) the following command is used:

```
psql -h localhost -p 5432 -U evergreen -d evergreen -f cz_load_concerto.sql
```

[Furthermore, a couple of OPAC templates have been modified:](#)

sablony_ceska_demo_instalace_v1.zip

Localization to Czech is implemented using [a set of steps described at Evergreen DokuWiki CZ](#).

The Czech demo installation was set up as part of a project entitled **Evergreen Demo Installation and Improvement of the Infrastructure for the Operation and Extension of**

the SPOK Common Catalog which Jabok Library worked on in 2020, using financial support kindly provided by the Ministry of Culture of the Czech Republic through its VISK 3 grant scheme.
