

Generování zpráv ze šablony

Generování zprávy se provádí v rozhraní pro zprávy pomocí šablon, uložených ve vnořených složkách složky „**Šablony**“. Pokud vnořená složka obsahuje další podsložky, zobrazuje se vedle jejího názvu typická žlutá ikonka složky. Neobsahuje-li složka další podsložky, ikonka je bílá. Kliknutím na šipku vedle složky nebo na ikonku se zobrazí či sbalí vnořené složky. Kliknutím na název složky se zobrazí položky, které složka obsahuje (v tomto případě šablony pro generování zpráv).

1. Klikněte na šipku vedle složky „Šablony“.

2. Z rozbaleného seznamu vyberte požadovanou složku, případně její podsložku a klikněte na její název.
3. Po otevření složky vyberte pomocí zaškrťovacího pole šablonu, kterou chcete použít, z rozbalovacího menu v horní části vyberte položku „**Vytvořit novou zprávu z vybrané šablony**“ a klikněte na tlačítko „**Potvrdit**“

Create a new report from selected template

Limit output to 10 [Create a new Template for this folder](#)

Vybrat	name	description	create_time	owner
☐	Historie vypujcek ctenare	(Nazev, autor, vydani + datum vypujcky a vraceni + carovy kod)	2013-02-13 15:28:12+0100	Eva
☐	Pujcovani a vraceni exemplaru - podle data vypujcky	(Carovy kod, datum vypujcky, datum vraceni, jmeno ctenare)	2013-02-13 09:53:01+0100	Eva
☐	Pujcovani a vraceni exemplaru - podle data vraceni	(Carovy kod, datum vypujcky, datum vraceni, jmeno ctenare)	2013-02-13 09:51:14+0100	Eva
☐	Vracene dokumenty za obdobi	(ctenari + carove kody)	2013-02-12 17:29:53+0100	Eva
☒	Seznam vypujcenyh exemplaru za obdobi	(carovy kod exemplare + ctenar)	2013-02-12 17:24:50+0100	Eva

Complete the first part of report settings. Only Report Name and Choose a folder... are required fields.

1) Template Name, Template Creator, and Template Description are for informational purposes only. They are hard coded when the template is created. At the report definition stage it is not possible to change them.

2) Report Name is required. Reports stored in the same folder must have unique names.

3) Report Description is optional but may help distinguish among similar reports.

4) Report Columns lists the columns that will appear in the output. This is derived from the template and cannot be changed during report definition.

5) Pivot Label Column and Pivot Data Column are optional. Pivot tables are a different way to view data. If you currently use pivot tables in MS Excel it is better to select an Excel output and continue using pivot tables in Excel.

6) You must choose a report folder to store this report definition. Only report folders under My Folders are available. Click on the desired folder to select it.

Select values for the Circulation > Check Out Date/Time. Use the calendar widget or manually enter the desired dates, then click Add to include the date on the list. You may add multiple dates.

The Transform for this field is Year + Month, so even if you choose a specific date (2009-10-20) it will appear as the corresponding month only (2009-10).

It is possible to select relative dates. If you select a relative date 1 month ago you can schedule reports to automatically run each month. If you want to run monthly reports that also show comparative data from one year ago, select a relative date 1 month ago, and 13 months ago.

Select a value for the Circulating Library. Complete the bottom portion of the report definition interface, then click Save.

1) Select one or more output formats. In this example the report output will be available as an Excel spreadsheet, an HTML table (for display in the staff client or browser), and as a bar chart.

2) If you want the report to be recurring, check the box and select the Recurrence Interval as described in Recurring Reports. In this example, as this is a report that will only be run once, the Recurring Report box is not checked.

3) Select Run as soon as possible for immediate output. It is also possible to set up reports that run automatically at future intervals.

4) It is optional to fill out an email address where a completion notice can be sent. The email will contain a link to password-protected report output (staff login required). If you have an email address in your Local System Administrator account it will automatically appear in the email notification box. However, you can enter a different email address or multiple addresses separated by commas.

Select a folder for the report's output. You will get a confirmation dialogue box that the Action Succeeded. Click OK.
